Careers Advice For Students

Supporting your child through the process of choosing study options and a future career is not an easy task. Some teenagers have a set idea of what they want to do after school, but it is also very common for them to feel unsure of what the future holds and lack direction.

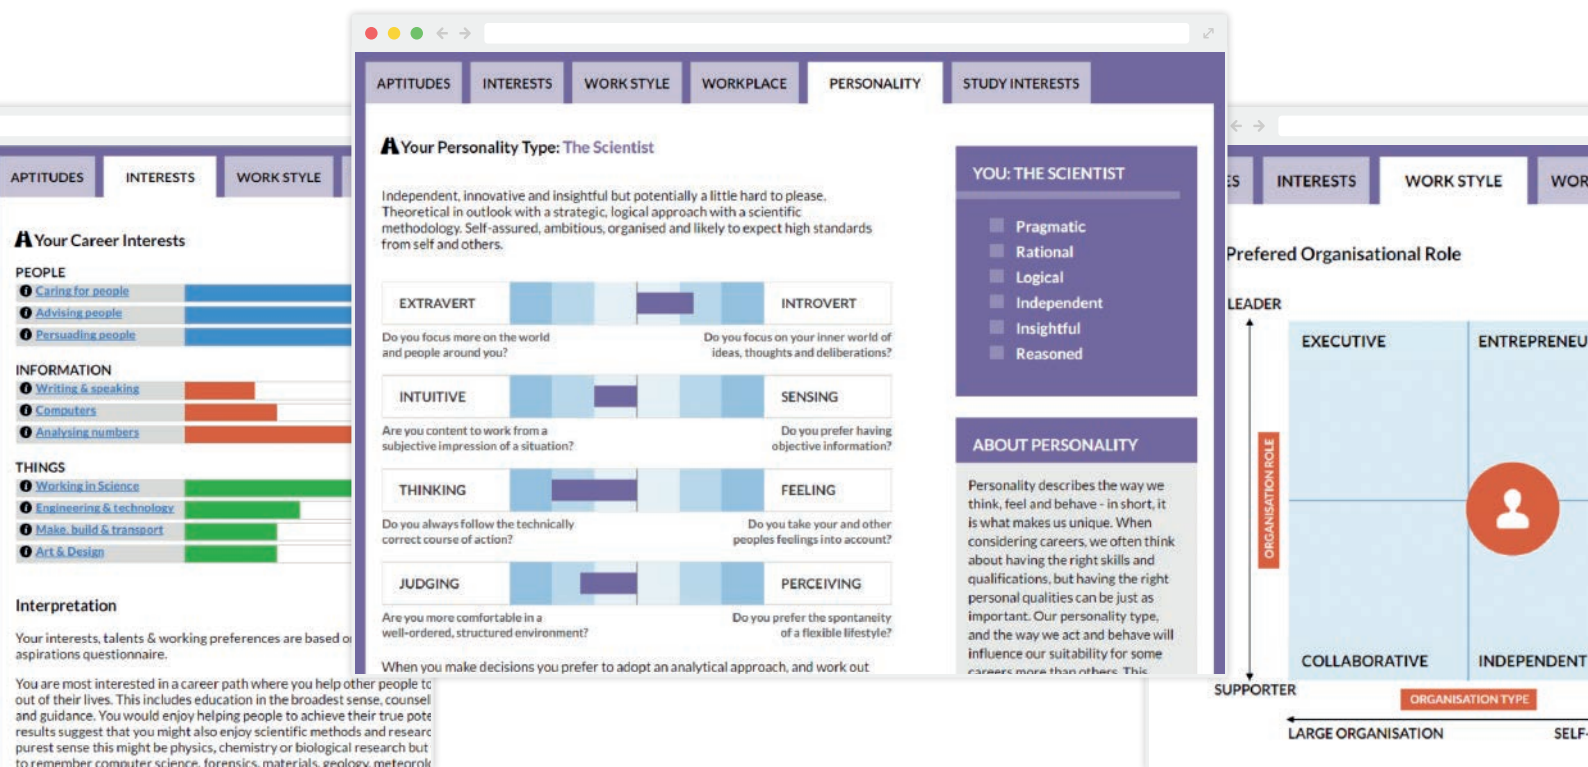

We have developed a flexible on-line careers tool, based on psychometric assessments, which can help and inspire your child to explore different career and education options and get a feel for the opportunities available to them.

Our careers and education planning tools are fully interactive and offer personalised advice, helping your child to choose options and make informed decisions about study pathways and career opportunities.

We have information about apprenticeships, colleges and degree courses and have a vast database of potential careers including salary expectations and the different routes to employment.

HOW DOES IT WORK?

- Students take a number of assessments, measuring aptitudes, work preferences and personality. We analyse and present the results in a personalised, dynamic web space.
- Careers are displayed in an interactive format and students can decide how much we should take their talents, interests and abilities into account with our suggestions
- With access to over 40,000 university courses in the UK & Europe, we offer an in-depth Course Finder service to help students decide on their further education options
- For those not wanting to go on to university, we also provide information on apprenticeship and entry level career opportunities
- Results & recommendations are also available in a downloadable report which updates every time the student makes a change to their preferences

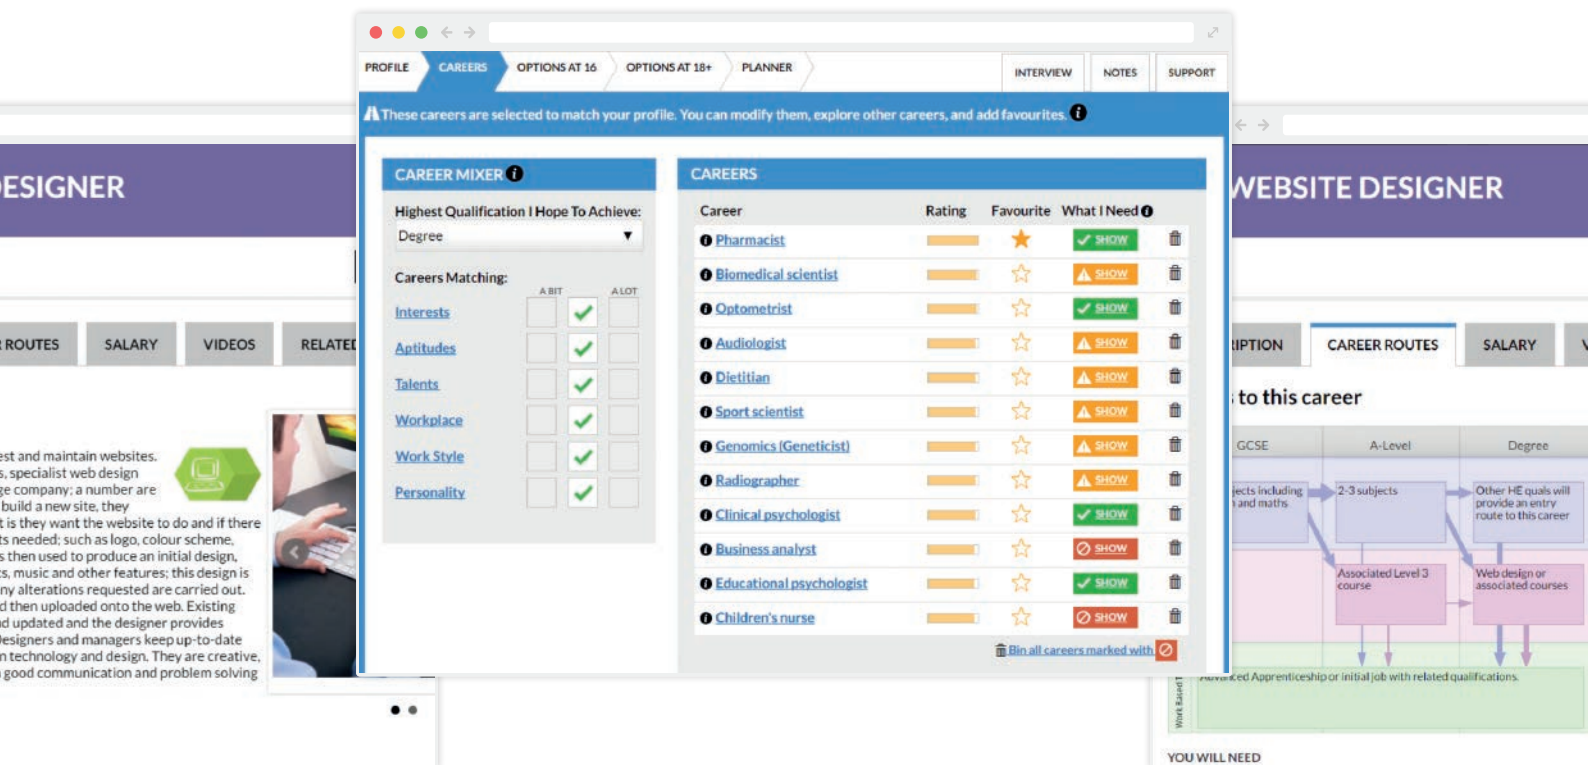

“ The information from Morrisby.com has helped to strengthen my thinking on the next steps in my career plans and A Level choices. ”

YEAR 11 STUDENT, RICHMOND SCHOOL
